DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2, 5-6, 9, and 11-14 are drawn to a method of modulating mycorhizal infection comprising transforming a plant with SEQ ID NO:2, classified in class 800 subclass 290 for example.
- II. Claims 1, 3, 5, 7, 9, and 11-14 are drawn to to a method of modulating mycorhizal infection comprising transforming a plant with SEQ ID NO:4, classified in class 800 subclass 290 for example.
- III. Claims 1, 4, 5, 8-9, and 11-14 are drawn to a method of modulating mycorhizal infection comprising transforming a plant with SEQ ID NO:10, classified in class 800 subclass 290 for example.
- IV. Claims 1 and 10 are drawn to a method of modulating mycorhizal infection comprising transforming a plant with SEQ ID NO:2 in antisense orientation, classified in class 800 subclass 290 for example.
- V. Claims 1 and 10 are drawn to a method of modulating mycorhizal infection comprising transforming a plant with SEQ ID NO:4 in antisense orientation, classified in class 800 subclass 290 for example.
- VI. Claims 1 and 10 are drawn to a method of modulating mycorhizal infection comprising transforming a plant with SEQ ID NO:10 in antisense orientation, classified in class 800 subclass 290 for example.

Application/Control Number: 09/657,631

Art Unit: 1638

Inventions I-VI are unrelated to each other. Applicant is reminded that nucleotide sequences either encoding different proteins, specifying specific expression patterns or sequences in antisense orientation are structurally distinct chemical compounds and are unrelated to one another, as are different proteins structurally distinct chemical compounds and unrelated to one another. These sequences are thus deemed to normally constitute **independent and distinct** inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 et seq (see MPEP 803.04 and 2434). This requirement is not to be construed as a requirement for an election of species, since each nucleotide sequence is not a member of a single genus of invention, but constitutes an independent and patentably distinct invention.

Each of Inventions I-VI are capable of being separately made, independently used, and the patentability of one does not render the others obvious or unpatentable.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, fields of search, and classification, restriction for examination purposes as indicated is proper

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Application/Control Number: 09/657,631

Art Unit: 1638

application. Any amendment of inventorship must be accompanied by a petition under 37

CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Stuart Baum whose telephone number is (703) 305-6997. The

examiner can normally be reached on Monday-Friday 8:30AM – 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Amy Nelson can be reached on (703) 306-3218. The fax phone numbers for the

organization where this application or proceeding is assigned are (703) 305-3014 or (703) 305-

3014 for regular communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the legal analyst, Kim Davis, whose telephone number is (703) 305-3015
